

# River View Primary & Nursery School Curriculum Impact

## Impact-

Geography at River View will allow the children to leave with an understanding of their local community and growing curiosity for the world beyond this. In EYFS, they will discover more about their world through their continuous provision and trips that they will go on. In Key Stage 1, they will complete a local geography project as well as exploring the curriculum through their I Wonder lessons. In Key Stage 2, the children will take part in another local geography project where they will build on their fieldwork skills and their I Wonder lessons will still be allowing their curiosity to grow.

## Impact of Geography

### Pupil Voice -

"It is about exploring the world" - Year 2

### Staff Voice-

"Maps that reflect the borders of the times has been beneficial to helping the children understand where people might have come from and to."
