

River View Primary & Nursery School Curriculum Impact

Impact:

At River View Primary and Nursery School, we strive for our children to enjoy and engage with the Science curriculum we deliver. We aim for engaging and purposeful lessons, with a significant practical element wherever possible. We encourage children to discuss, debate, reflect, hypothesise and investigate, allowing them to think about concepts more deeply as well as developing their use and understanding of scientific vocabulary.

Our new Science programme will further develop the practical element of Science teaching and learning, which we know our children love, and which we know creates memorable and meaningful learning.

Impact Of Science

Staff Voice:

I have enjoyed using the new scheme to plan our lessons as it makes lessons very practical. (Year 5 Teacher)

The children enjoy carrying out lots of investigations (Year 4 Teacher)

The children love learning and using new scientific skills. (Year 2)

Pupil Voice:

I really like Science because my teacher makes it cool. We planted some plants during Science week. (Year 2/3)

I loved learning how electricity works (Year 4)

My favourite lesson is Science because we get to do experiments. (Year 5)

Science is fun! (Year 1)
