

1) How does safeguarding operate within school?

Everybody is responsible to report concerns of a child's well-being; Referral's should be made on the new online system – My Concern. If any staff members are in doubt they should speak to MH. The concerns are investigated and referred if necessary to the correct agency. MW and DB are the DSL; they have the overview of taken actions and have the overall responsibility for agreeing decisions and actions.

2) How many incidents have been reported?

Before the new system was put in place there was between 5 and 8 paper copies of reported incidents, however since the new system has been put in there has only been 2 incidents reported so far. The incidents that are reported are generally from year 3 and lower, and only a few incidents are reported from year 4+.

3) Does all staff know the procedures of reporting a safeguarding issue?

Yes, all staff members have recently had training on the new system of reporting incidents, however as it is so new, when it comes to writing a concern, some staff members may need to have a refresh as to how to complete this, MH is happy to help with this.

4) How many incidents have been reported to LADO?

MH no reports have been made since she has been in her post, however MW and/or DB will need to do LADO referrals.

5) How many LAC children are there in school?

There is one LAC child at the moment with the potential of one more joining soon.

6) Have we had any incidents of FGM?

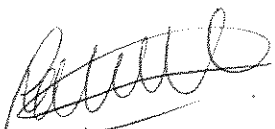

Nothing that has been reported since MH has started at her post, also none that were passed onto her from previous cases.

7) Have we had any incidents of children missing in education?

Nothing that has been reported since MH has started at her post, also none that were passed onto her from previous cases.

8) Is everybody up to date with prevent training?

Everybody is responsible for keeping their training up to date, MH does not have a copy of the members of staffs which have or have not done this training.
